Education

Higher education (2019 – 2023):

PIM Univerzity, Faculty of Computer Science 4/4

- Bachelor of Engineering in Computer Science and Information Technology

High school (2015 – 2019):

Srednja ekonomska škola, Sarajevo

- Economic technician

Primary school (2006 – 2015):

OŠ "Velešićki heroji", Sarajevo

Skills

Programming Skills

- MERN Stack
- JavaScript, TypeScript
- React, Next.js, Remix
- Tailwind, CSS, Polaris
- Shopify Development
- Docker
- Word
- Responsive Web Design
- GraphQL, Rest
- MySQL, Prisma
- Python, PHP

Graphic design Skills

- Adobe Illustrator
- Adobe Photoshop
- Logo Design
- Blender
- 3D Design

Other Skills

- Windows, Mac, Linux
- Sony Vegas, PremierPro
- Camtasia Studio
- Mc Office
- Visual Effects

Personal Characteristics

- Persistance
- Responsibility
- Diligence
- Adaptability
- Team player
- Fast Learner
- Commitment
- Ability for Multitask

About me

- I am an ambitious and driven individual with a relentless desire to excel in life and make a mark in the IT industry. My diverse interests span the realms of technology, creative design, and sports. As a lifelong learner, I am constantly expanding my horizons and staying updated with the latest trends in the IT world. With a solid educational foundation in computer science, I have cultivated a versatile skill set that fuels my motivation to tackle new challenges head-on and achieve remarkable outcomes. My passion for graphic design fuels my creative flair, allowing me to craft visually captivating and user-friendly solutions. When I'm not immersed in the world of technology, you can find me on the basketball court, honing my skills as a referee. This experience has taught me the value of fair play, quick decision-making, and effective communication—traits that seamlessly integrate into my professional life.

Experience

Shop Circle BH (Dec 2023 - Present):
Shop Circle BH | Zmaja od Bosne 74, Sarajevo 71000

- Fullstack Developer with a strong focus on JavaScript-based frontend development. While contributing across the stack, I've primarily taken on Frontend Lead roles due to my expertise in modern frontend technologies. I began as Frontend Lead on the Sky Pilot application, and after successfully completing that project, I transitioned to lead frontend development for SC Loyalty Points and Rewards, where I'm currently active. I also supported the Hulk Mobile App Builder project and recently assumed the Frontend Lead role on the SC Product Option application.
- In addition to leading individual applications, I architected a fully optimized and reusable frontend setup used across all new Shopify applications at Shop Circle. This includes a structured file and folder system tightly integrated with Shopify CLI, designed for scalability, performance, and developer efficiency.
- My main strengths lie in JavaScript and React, used to build highly interactive user interfaces, alongside Vue.js for the Hulk Mobile App Builder. I've mastered Shopify's Polaris design system and the Remix framework for building performant applications. While my primary focus has been frontend, I've also gained hands-on experience with PHP, MySQL, Docker, and MongoDB through backend collaboration, as most backend components were PHP-based.

Ant Colony Intership (Apr 2023 - Jul 2023):
Ant Colony | Kolodvorska 12, Sarajevo 71000

- During my internship at AntColony, I worked as a Full Stack Developer, mastering technologies like TypeScript, React, and Tailwind for frontend development, and building robust APIs with Node.js for the backend. Collaborating with skilled mentors and a motivated team, we formed the most advanced group in the program. I actively engaged with the design team to create visually appealing and user-friendly interfaces while prioritizing data security. Exposure to diverse aspects of software development, including software architecture and RESTful API design, broadened my skill set. Working in an agile project management framework taught me adaptability and effective problem-solving. The guidance and mentorship from experienced colleagues were invaluable, sparking a passion for delivering innovative solutions. My time at AntColony left a lasting impact, inspiring continuous growth and a desire to make a meaningful contribution as a professional Full Stack Developer.

Zira Talent Academy (Mar 2022 - Jun 2022):

Zira l UNITIC Business Tower, Fra Anđela Zvizdovića 1

- During my internship at Zira Talent Academy, I had the opportunity to work on developing websites for movies, gaining hands-on experience in both frontend and backend development. My primary objective was to create a user-friendly platform allowing users to browse and filter movies based on various criteria. Throughout the internship, I focused on building a robust backend for the website, utilizing APIs to establish seamless communication between frontend and backend components. Ensuring scalability and security were fundamental considerations during the development process, as they are vital aspects of web application development. My time at Zira Talent Academy was incredibly valuable, providing me with practical experience in web application development. This internship opportunity enriched my skills and knowledge in creating functional and user-centric websites, and I am eager to apply this experience to contribute to future projects in the field.

Graphic design (Jul 2021 - Nov 2023):

Majestic Games l East 45, Abu Dhabi Island, Abudhabi, AE

- I worked as a freelance graphic designer for Majestic Games, specializing in mobile game development. I created a wide range of visual elements for games, including characters, animations, and backgrounds. I also designed assets for social media, user interfaces, and overall user experience. Thanks to my creative approach and use of modern technologies, my designs contributed to both innovation and visual appeal in the gaming experience.

Basketball referee (Sep 2019 - Present):

Sarajevo Canton Basketball Association

- During an impressive 12-year journey as a basketball player, I developed a passion and deep understanding of the game, which inspired me to pursue a career in basketball officiating. Determined to achieve excellence in my new role, I quickly advanced in refereeing and am now proudly listed as a licensed referee for the Basketball Federation of Bosnia and Herzegovina. My experience as a player has provided me with a deeper insight into the game, enabling me to deliver objective officiating in line with the rules of play. Working in various basketball leagues and competitions has allowed me to gain invaluable experience in managing games and participating in high-level sports events.

Assistant Production Manager for Dino Merlin (2019 - 2024):

Magaza | Ćurčiluk veliki 20, Sarajevo 71000

- I was deeply involved in Dino Merlin's production, focusing on scenography, stage effects, equipment logistics, and stage setup. Collaborating closely with the creative team, I brought stage designs to life, harmonizing seamlessly with Dino Merlin's artistic vision. I managed lighting, effects like smoke machines, confetti cannons, and more for dynamic performances. As a roadie, I ensured instrument setup, technical coordination, and optimal sound quality. Moreover, I orchestrated equipment transportation and setup, contributing to flawless execution. Overall, my multifaceted role significantly enhanced the concert experience and contributed to Dino Merlin's captivating performances' success.
